### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Mueller on 12/3/04.

The application has been amended as follows:

**In the claims:**

Claims 42-60 have been canceled.

2. The following is an examiner's statement of reasons for allowance:

Applicant's arguments, see page 6, lines 15-23 to page 10, lines 1-3 of the appeal brief, filed 8/9/04, are convincing in overcoming the prior art rejections of the final rejection mailed 4/5/04. It is agreed that because the claims explicitly recite that the roller is formed with a length within a range of 3 to 12 m and a diameter within a range of 450 to 1500 mm and is structured to withstand compressive forces of up to  $130 \text{ N/mm}^2$ , there would be no motivation to combine the Eddy reference with the [AAPA] because they are non-analogous art. The Eddy reference is directed to a printer/copier fuser type rolls which do not have rolls that are 3 to 12 m in length and a diameter within a range of 450 to 1500 mm. Printer/copier rolls are typically much smaller than the claimed sizes of the instant roller.

Art Unit: 3726

Therefore, the prior art does not teach or suggest an elastic roller including at least a portion of filler comprising metallic fillers arranged to improve thermal conductivity of the elastic coating layer such that heat is dissipated toward the hard roller core and dissipated axially by the hard roller core, wherein the elastic coating layer has a smooth surface structured and arranged for smoothing paper webs, wherein the elastic roller is formed with a length within a range of 3 to 12 m and a diameter within a range of 450 to 1500 mm and is structured to withstand compressive forces of up to  $130 \text{ N/mm}^2$ , in combination with all of the other claim limitations.

Linking claim 1 is allowed. Since the restriction requirement between Species A-B, as set forth in the Office action mailed on 9/10/01, was conditioned on the nonallowance of the linking claim(s), **the restriction requirement as to the linked inventions is hereby withdrawn.** Claims 4-10, 37, and 40, previously withdrawn from consideration as a result of the restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement as to the linked inventions, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Art Unit: 3726

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc Jimenez whose telephone number (571) 272-4530. The examiner can normally be reached on Monday-Friday between 5:30 a.m.-2:00 p.m.
